3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Securities, including:

1. Risks related to the structure of the securities:

The return on the Securities depends on the performance of the Underlying Reference(s) and the capital protection applies only at Maturity.

2. Risks related to the underlying and its disruption and adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to be adversely affected than an investment in conventional debt securities.

Exposure to indices, adjustment events and market disruption or failure to open of an exchange may have an adverse effect on the value and liquidity of the Securities.

3. Risks related to the trading markets of the securities:

The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risks:

The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

The Manager and its affiliates may also have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform other services for, the Issuer and the Guarantor and their respective affiliates in the ordinary course of business.

Quais são os principais riscos que são específicos dos valores mobiliários?

A maioria dos fatores de risco material específico dos valores mobiliários

Existem também riscos associados aos Valores Mobiliários, incluindo:

1. Riscos relacionados com a estrutura dos valores mobiliários:

O rendimento sobre os Valores Mobiliários depende do desempenho da(s) Referência(s) Subjacente(s) e a proteção de capital aplica-se apenas no Vencimento.

2. Riscos relacionados com a subjacente e a perturbação e ajustamentos:

Os Valores Mobiliários indexados estão associados ao desempenho de um índice subjacente (um "Índice"), que podem referenciar várias classes de ativos tais como capitais próprios, obrigações, taxas cambiais ou dados de preços imobiliários, ou podem referenciar um misto de classes de ativos. Os Investidores em Valores Mobiliários Indexados correm o risco de um conjunto mais vasto de circunstâncias que significa que os ativos subjacentes ao Índice não têm um desempenho conforme esperado em comparação com um investimento em títulos de dívida convencionais. Assim, o rendimento sobre um investimento em Valores Mobiliários Indexados é mais provável de ser afetado de forma adversa que um investimento em títulos de dívida convencionais.

Exposição a índices, eventos de ajustamento e perturbação do mercado ou a falha em abrir uma troca que possa ter um efeito adverso sobre o valor e a liquidez dos Valores Mobiliários

3. Riscos relacionados com os mercados de negociação dos valores mobiliários:

O preço de negociação dos Valores Mobiliários pode ser afetado por diversos fatores incluindo, mas não se limitando ao preço relevante, valor ou nível da (s) Referência (s) Subjacente (s), o período restante até à data de reembolso agendada dos Valores Mobiliários, a volatilidade atual ou implícita associada à (s) Referência (s) Subjacente (s) e risco de correlação da (s) Referência (s) Subjacente (s) relevantes. A possibilidade de o valor e o preço de negociação dos Valores Mobiliários flutuar (positiva ou negativamente) depende de vários fatores, que os investidores devem considerar cuidadosamente antes de comprar ou vender Valores Mobiliários.

4. Riscos legais:

As condições dos Valores Mobiliários contereão disposições relativas à convocação de reuniões de Titulares de Valores Mobiliários para abordar assuntos que afetem os seus interesses em geral. Essas disposições definem maiorias que vinculam todos os titulares, inclusive titulares que não compareceram e votaram na reunião e titulares que votaram contra o que foi deliberado pela maioria.
